FALL - WINTER 2025

ANNE
DE
SOLÈNE
PARIS - 1906

Heir to a Vosage spinning mill, created in 1906, the French brand Anne de Solène symbolizes exceptional French household linen, hand drawn and made using the best fabrics and with respect for traditions.

Creativity and femininity have always distinguished our collections, down to the smallest detail our quest for true elegance and absolute comfort.

Anne de Solène is known for its history, but also for its strong values, industrial know-how, and for its environmental commitments.

Its atelier, based in Fontaine au Pire, in the North of France, gives Anne de Solène industrial mastery of its productions, and its teams preserve the know-how in the purest French tradition.

The majority of our products carry the OEKO-TEX® STANDARD 100 label, and every product is inspected at every stage of production of the manufacturing process.

Anne de Solène also offers collections of printed bed linen in cotton from organic farming.

MAJESTIC SIMPLICITY

The Fall-Winter 2025 collection focuses on harmony, nature and contemplation. These are illustrated in a setting which encourages a meditative state – landscapes, seasonal cycles and living elements.

These convey a message emphasizing the importance of reconnecting with the seasons, with a color palette inspired by natural elements such as wood, frost, moss, leaves and snow.

It speaks to us of well-being, of harmony of body and spirit, of a contemplative attitude that restores energy and balance.

Sensitive, attentive to the seasons, to the cycles of life, to the biodiversity that surrounds us, we become aware of nature's ephemeral beauty and savor these moments of wonder.

A new, streamlined stylized script appears on selected motifs in the Fall-Winter 2025 collection.

Designs inspired by projected shadows, the changing reflections of sky and water, hues which draw on the bluish reflections of frost, the vermilion red of maple leaves.

Not forgetting the classic motifs so dear to the house's brand, which sublimate this sober decor and create a link with the vegetation outside.
